A schematic symbol for an N-channel MOSFET. It consists of a circle with a vertical line on the left side, representing the gate. Two horizontal lines on the right side represent the drain and source. The drain is at the top and the source is at the bottom. The pins are labeled 1, 2, and 3 from left to right.

General Description

This power MOSFET is produced with advanced technology of SAMWIN. This technology enable the power MOSFET to have better characteristics, including fast switching time, low on resistance, low gate charge and especially excellent avalanche characteristics.
